4.0 Organizational Excellence

	Benchmark	Target	Results	Quarterly trend	Annual trend
4.1 Actual versus CIHI expected length of stay ratio	1.00	1.00	1.04	+	-
4.2 Overall hospital readmission rate	9.0	9.0	6.6	+	+
4.3 Variance in actual spending on operating budget	0 %	+/- 1%	- 14.4 %	-	-

Trend: + positive - Negative ○ Stable

# 1.1 Hospitalization rate for ambulatory care sensitive conditions

Indicator showing hospitalizations for conditions that could have been prevented by better management by primary health care.

English

Français

2025-02-28

**i** Hospitalization for ambulatory care sensitive conditions is considered a measure of access to appropriate primary care. While not all admissions for these conditions are preventable, it is assumed that appropriate ambulatory care could prevent the onset of this type of disease or condition, help control an acute care episodic disease or condition, or help manage a chronic condition or disease.

**gauge** Precision  
There are 7 favourable conditions: COPD, angina, asthma, diabetes, hypertension, heart failure, epilepsy Excludes those aged 75 and older Excludes deaths

**M** Formula  
Total number of cases over 12 months / Area population

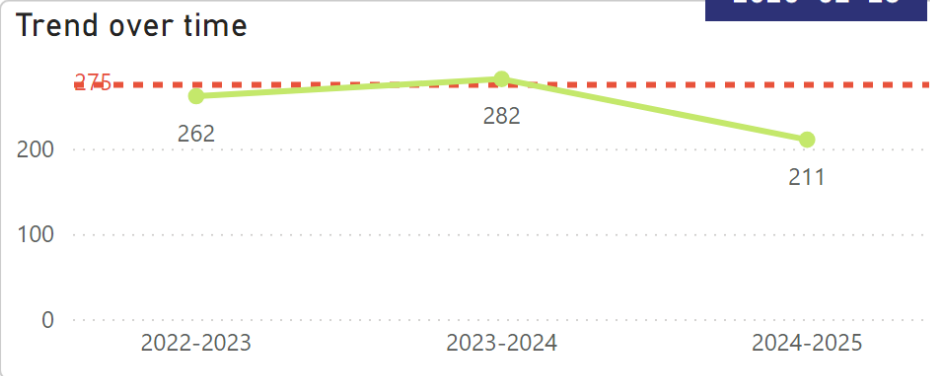

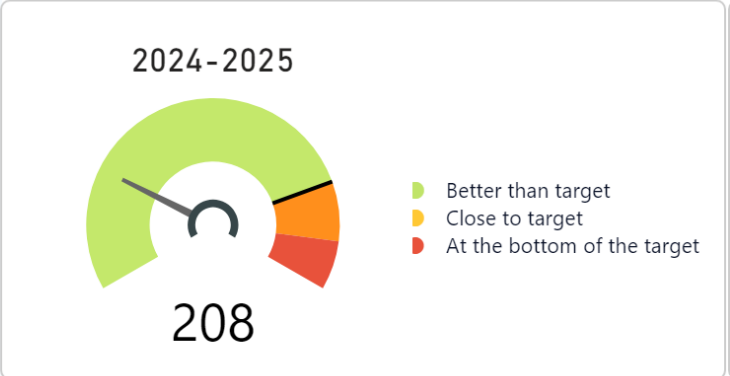

**person** Leadership  
Patrick Parent et Jenny Toussaint

**database** Data source

# 1.4 Percentage of surgeries waiting more than 365 days

English

Français

2025-02-28

**i** For surgeries waiting, wait times are calculated for surgeries waiting as of the last day in each quarter from the date that the patient and surgeon agree to the surgery and the patient is ready to receive it. Wait time is calculated using data collected through the Surgical Access Registry. These statistics do not include emergency surgeries. Timeframes during which the patient was not available to have surgery are excluded from wait time calculations.

**Σ** Formula  
 Number of surgeries waiting more than 12 months / Total surgeries waiting

## 2.0 Patient Experience

### 2.1 Percentage of level 4 and 5 visits to the emergency department

Indicator that indirectly shows the level of access to primary health care in a given region.

English

Français

2025-02-28

This indicator reflects the percentage of level 4 and 5 visits to the Emergency Department. When visiting the Emergency Department, the acuity of the visit will be coded based on the Canadian Triage and Acuity Scale. Level 4 and 5 visits to the Emergency Department are considered less urgent.

Precision

Patients referred to the community or who leave without seeing the doctor are included in the indicator.

Formula

$B - A$  Calendar days

### 3.4 Vacant positions (permanent positions)

Indicator that shows the percentage of positions posted without being filled.

English

Français

2025-02-28

Description

Percentage representing the number of vacant positions relative to the average number of positions in the organization for the reference period.

Precision

None

Formula

$(\text{Number of vacancies (period)} / \text{Total or average number of positions in the organization}) \times 100$

4.0 Organizational Excellence

4.1 Actual versus CIHI expected length of stay ratio

Indicator that shows the effectiveness of length of stay in Network hospitals.

English

Français

2025-02-28

**i** This indicator represents the effectiveness of the length of stay in our hospitals for typical cases. It represents the difference between the length of stay in acute care and CIHI's expected length of stay. Typical cases exclude deaths, transfers between acute care facilities, discharges against physician advice, and extended stays (beyond the demarcation point). ALC days are also excluded from the calculation for this indicator.

**gauge**  
Precision  
None

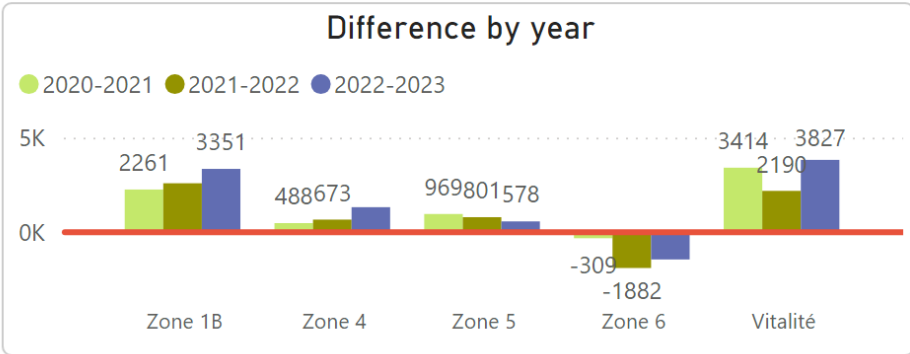

**Σ**  
Formula  
Number of typical hospitalization days / the number of days of hospitalization planned by CIHI

## 4.2 Overall hospital readmission rate

Indicator that shows the rate of readmission within 30 days of a patient's discharge from hospital.

English

Français

2025-02-28

**i** This indicator measures the risk-adjusted rate of urgent readmissions within 30 days of discharge for episodes of care for the following patient groups: obstetric, pediatric, surgical and medical.

**gauge**  
Precision  
None

**Σ**  
Formula  
Observed number of readmissions for each facility /  
Expected number of readmissions for the facility \*  
Canadian average readmission rate
